# SIVASANKAR P

## FRONTEND DEVELOPER

Portfolio: [sivasankar.vercel.app](https://sivasankar.vercel.app)  
[github.com/sivasankarp01](https://github.com/sivasankarp01)  
[linkedin.com/in/sivasankarp001/](https://linkedin.com/in/sivasankarp001/)

Results-driven Frontend Developer with 3+ years of experience building scalable web and mobile applications using React.js, Next.js, JavaScript, and Flutter. Proven expertise in developing responsive user interfaces, integrating RESTful APIs, implementing secure authentication systems, and optimizing application performance. Successfully delivered 10+ production-ready applications across enterprise and client-facing platforms. Experienced in Agile development, modern frontend architecture, and cloud deployment environments. Currently based in Dubai on an Employment Visa and available for immediate joining.

### SKILLS

|                           |                                                                                                     |
|---------------------------|-----------------------------------------------------------------------------------------------------|
| Frontend Development      | React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Vite, Webpack, SSR, SEO Optimization |
| Mobile Development        | Flutter, React Native, Dart, Hive, Firebase, FVM, FCM, Cross-platform Mobile App Development        |
| UI/UX Design              | Figma, Photoshop, Canva, AdobeXD, TailwindCSS, Bootstrap, Material UI, Responsive Design            |
| State Management          | ReduxToolkit, Zustand, Context, BloC, Provider, GetX                                                |
| Testing & QA              | Unit Testing, Widget Testing, Jest, API Testing, Debugging, Manual Testing, Integration Testing     |
| Cloud & DevOps            | AWS EC2, Nginx, PM2, Linux Server Management, CI/CD, GitHub Actions, Production Deployment          |
| Backend & API Integration | REST APIs, GraphQL, WebSockets, Firebase, JWT Authentication, Error Handling, Retry Logic           |
| Backend & Databases       | Basic knowledge of Node.js, Django, MySQL, PostgreSQL, MongoDB, Firebase Firestore, SQLite          |
| Tools & Technologies      | Git, Postman, VS Code, Grafana, Android Studio, Xcode, Firebase Console, Linux, MS Office           |
| Software Engineering      | Clean Architecture, Code Splitting, Lazy Loading, Performance Optimization, Debugging, Agile, SDLC  |

### TECHNICAL EXPERIENCE

|                                                                         |                                                     |
|-------------------------------------------------------------------------|-----------------------------------------------------|
| <b>Frontend Developer</b><br><i>Saadah Investment LLC (Sakab Group)</i> | <b>June 2025 — Present</b><br><i>Abu Dhabi, UAE</i> |
|-------------------------------------------------------------------------|-----------------------------------------------------|

- Develop, test, and deploy production-grade web and mobile applications using React.js, Next.js, Angular, and Flutter with TypeScript and JavaScript, delivering scalable features supporting 1,000+ users in Agile sprint cycles with consistent on-time delivery.
- Follow SDLC best practices to produce clean, maintainable code, participate in peer code reviews, and ensure reliable testing and debugging for high-quality production releases.
- Integrate REST and GraphQL APIs with robust error handling and retry logic, improving application reliability, system performance, and real-time data processing within microservices-based architectures.
- Deploy and maintain applications on AWS infrastructure using Nginx, Docker, and CI/CD pipelines, optimizing load times, scalability, and production stability across web and mobile platforms.

|                                                                                             |                                                      |
|---------------------------------------------------------------------------------------------|------------------------------------------------------|
| <b>Project Engineer (Frontend Developer)</b><br><i>The Zigma Technologies India Pvt Ltd</i> | <b>July 2023 — May 2025</b><br><i>Chennai, India</i> |
|---------------------------------------------------------------------------------------------|------------------------------------------------------|

- Develop and maintain both web and mobile applications using React.js, Next.js, and Flutter for Android and iOS platforms, delivering 5+ production systems with improved usability, performance, and user engagement.
- Build reusable UI component libraries and responsive interfaces, increasing code reusability and reducing development time across multiple projects.
- Implement secure authentication workflows and integrate REST APIs and Firebase services to support scalable application functionality across web and mobile environments.
- Manage application deployments to Google Play Store and Apple App Store and configure CI/CD pipelines on AWS to ensure reliable production releases and system availability.

|                                                                              |                                                          |
|------------------------------------------------------------------------------|----------------------------------------------------------|
| <b>Mobile Application Developer Intern</b><br><i>CERP Software Solutions</i> | <b>July 2022 — March 2023</b><br><i>Bengaluru, India</i> |
|------------------------------------------------------------------------------|----------------------------------------------------------|

- Develop Flutter-based Android applications with responsive user interfaces optimized for multiple devices and screen sizes, improving usability and user experience.
- Handle Google Play Store release processes, including application builds, version management, and production deployment of mobile applications.
- Perform release testing, debugging, and issue resolution before Play Store submission, ensuring application stability and reliable performance.

### EDUCATION

|                                                                                                                                                                                                                          |                    |

## PROJECTS

---

### **Bazaario E-commerce Platform**

- Built and deployed a full-featured e-commerce platform using Next.js and React.js with product management, order processing, and secure user authentication.
- Implemented CI/CD pipelines and deployed applications on AWS EC2 using Nginx to automate build and deployment processes.

### **Zigma Work Pro — Employee Attendance System**

- Developed a face recognition-based attendance system using Flutter, Firebase, and ML Kit to automate attendance tracking.
- Reduced manual attendance errors by 90% through workflow automation and real-time data synchronization.

### **Crypto Dashboard (Tezcai)**

- Built real-time dashboards using Next.js and React.js displaying financial and transaction analytics through REST API integration.
- Improved application performance and SEO ranking through frontend optimization and responsive UI design.

### **Manpower — Worker Booking Application**

- Developed a real-time worker booking application using Flutter and Firebase supporting chat, notifications, and geolocation features.
- Integrated Firebase messaging services to enable reliable real-time communication and task management.

## CERTIFICATIONS

---

### **Advanced React — Meta (Coursera)**

- Completed advanced training in React including hooks, component architecture, performance optimization, and modern frontend development practices.

### **React Basics — Meta (Coursera)**

- Learned core React concepts including components, state management, props, and building responsive user interfaces.

### **Frontend Developer — Meta (Coursera)**

- Gained practical knowledge in HTML, CSS, JavaScript, responsive design, and modern frontend development workflows.

### **Version Control with Git — Meta (Coursera)**

- Developed skills in Git version control, branching strategies, collaboration workflows, and repository management using GitHub.

### **JavaScript Programming — Meta (Coursera)**

- Learned JavaScript fundamentals including ES6 features, asynchronous programming, debugging, and application development.
